Jeff Edison, Chairman and Chief Executive Officer of PECO stated: "The PECO team delivered another solid quarter of growth with same-center NOI increasing by 5.3%, and our portfolio reached new record highs in occupancy and renewal rent spreads. The continued strength of our operating performance is attributed to our differentiated and focused strategy of exclusively owning grocery-anchored neighborhood shopping centers and our ability to drive results at the property level through our integrated and cycle-tested operating platform, as evidenced by our Neighbor retention rate of 94% during the second quarter. Discussion and Reconciliation of Non-GAAP Measures

Same-Center Net Operating Income

The Company presents Same-Center NOI as a supplemental measure of its performance. The Company defines NOI as total operating revenues, adjusted to exclude non-cash revenue items, less property operating expenses and real estate taxes. For the three and six months ended June 30, 2023 and 2022, Same-Center NOI represents the NOI for the 262 properties that were wholly-owned and operational for the entire portion of all comparable reporting periods. The Company believes Same-Center NOI provides useful information to its investors about its financial and operating performance because it provides a performance measure of the revenues and expenses directly involved in owning and operating real estate assets and provides a perspective not immediately apparent from net income (loss). Because Same-Center NOI excludes the change in NOI from properties acquired or disposed of after December 31, 2021, it highlights operating trends such as occupancy levels, rental rates, and operating costs on properties that were operational for all comparable periods. Other REITs may use different methodologies for calculating Same-Center NOI, and accordingly, PECO's Same-Center NOI may not be comparable to other REITs.

Same-Center NOI should not be viewed as an alternative measure of the Company's financial performance as it does not reflect the operations of its entire portfolio, nor does it reflect the impact of general and administrative expenses, depreciation and amortization, interest expense, other income (expense), or the level of capital expenditures and leasing costs necessary to maintain the operating performance of the Company's properties that could materially impact its results from operations.

Nareit Funds from Operations and Core Funds from Operations

Nareit FFO is a non-GAAP financial performance measure that is widely recognized as a measure of REIT operating performance. The National Association of Real Estate Investment Trusts ("Nareit") defines FFO as net income (loss) computed in accordance with GAAP, excluding: (i) gains (or losses) from sales of property and gains (or losses) from change in control; (ii) depreciation and amortization related to real estate; and (iii) impairment losses on real estate and impairments of in-substance real estate investments in investees that are driven by measurable decreases in the fair value of the depreciable real estate held by the unconsolidated partnerships and joint ventures. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect Nareit FFO on the same basis. The Company calculates Nareit FFO in a manner consistent with the Nareit definition.

Core FFO is an additional financial performance measure used by the Company as Nareit FFO includes certain non-comparable items that affect its performance over time. The Company believes that Core FFO is helpful in assisting management and investors with the assessment of the sustainability of operating performance in future periods, and that it is more reflective of its core operating performance and provides an additional measure to compare PECO's performance across reporting periods on a consistent basis by excluding items that may cause short-term fluctuations in net income (loss). To arrive at Core FFO, the Company adjusts Nareit FFO to exclude certain recurring and non-recurring items including, but not limited to: (i) depreciation and amortization of corporate assets; (ii) changes in the fair value of the earn-out liability; (iii) amortization of unconsolidated joint venture basis differences; (iv) gains or losses on the extinguishment or modification of debt and other; (v) other impairment charges; (vi) transaction and acquisition expenses; and (vii) realized performance income.

Nareit FFO and Core FFO should not be considered alternatives to net income (loss) under GAAP, as an indication of the Company's liquidity, nor as an indication of funds available to cover its cash needs, including its ability to fund distributions. Core FFO may not be a useful measure of the impact of long-term operating performance on value if the Company does not continue to operate its business plan in the manner currently contemplated.

Accordingly, Nareit FFO and Core FFO should be reviewed in connection with other GAAP measurements, and should not be viewed as more prominent measures of performance than net income (loss) or cash flows from operations prepared in accordance with GAAP. The Company's Nareit FFO and Core FFO, as presented, may not be comparable to amounts calculated by other REITs.

Earnings Before Interest, Taxes, Depreciation, and Amortization for Real Estate and Adjusted EBITDAre

Nareit defines Earnings Before Interest, Taxes, Depreciation, and Amortization for Real Estate ("EBITDAre") as net income (loss) computed in accordance with GAAP before: (i) interest expense; (iii) income tax expense; (iii) depreciation and amortization; (iv) gains or losses from disposition of depreciable property; and (v) impairment write-downs of depreciable property. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect FBITDAre on the same basis.

Adjusted EBITDAre is an additional performance measure used by the Company as EBITDAre includes certain non-comparable items that affect the Company's performance over time. To arrive at Adjusted EBITDAre, the Company excludes certain recurring and non-recurring items from EBITDAre, including, but not limited to: (i)

changes in the fair value of the earn-out liability; (ii) other impairment charges; (iii) amortization of basis differences in the Company's investments in its unconsolidated joint ventures; (iv) transaction and acquisition expenses; and (v) realized performance income.

The Company uses EBITDAre and Adjusted EBITDAre as additional measures of operating performance which allow it to compare earnings independent of capital structure, determine debt service and fixed cost coverage, and measure enterprise value. Additionally, the Company believes they are a useful indicator of its ability to support its debt obligations. EBITDAre and Adjusted EBITDAre should not be considered as alternatives to net income (loss), as an indication of the Company's liquidity, nor as an indication of funds available to cover its cash needs, including its ability to fund distributions. Accordingly, EBITDAre and Adjusted EBITDAre should be reviewed in connection with other GAAP measurements, and should not be viewed as more prominent measures of performance than net income (loss) or cash flows from operations prepared in accordance with GAAP. The Company's EBITDAre and Adjusted EBITDAre, as presented, may not be comparable to amounts calculated by other REITs.

In addition to GAAP measures, this supplemental disclosure contains and refers to certain non-GAAP measures. We do not consider our non-GAAP measures included in our Glossary of Terms to be alternatives to measures required in accordance with GAAP. Certain non-GAAP measures should not be viewed as an alternative measure of our financial performance as they may not reflect the operations of our entire portfolio, and they may not reflect the impact of general and administrative expenses, depreciation and amortization, interest expense, other income (expense), or the level of capital expenditures and leasing costs necessary to maintain the operating performance of our properties that could materially impact our results from operations. Additionally, certain non-GAAP measures should not be considered as an indication of our liquidity, nor as an indication of funds available to cover our cash needs, including our ability to fund distributions, and may not be a useful measure of the impact of long-term operating performance on value if we do not continue to operate our business in the manner currently contemplated. Accordingly, non-GAAP measures should be reviewed in connection with other GAAP measurements, and should not be viewed as more prominent measures of performance than net income (loss) or cash flows from operations prepared in accordance with GAAP. Other REITs may use different methodologies for calculating similar non-GAAP measures, and accordingly, our non-GAAP measures may not be comparable to other REITs. Reconciliations of our non-GAAP measures to the most directly comparable GAAP financial measures are included in this supplemental disclosure on pages 15-20 and definitions of our non-GAAP measures are included in our Glossary of Terms on page 61.

Management Commentary

Jeff Edison, Chairman and Chief Executive Officer of PECO stated: "The PECO team delivered another solid quarter of growth with same-center NOI increasing by 5.3%, and our portfolio reached new record highs in occupancy and renewal rent spreads. The continued strength of our operating performance is attributed to our differentiated and focused strategy of exclusively owning grocery-anchored neighborhood shopping centers and our ability to drive results at the property level through our integrated and cycle-tested operating platform, as evidenced by our Neighbor retention rate of 94% during the second quarter. We continue to see strong retailer demand, which we are converting into higher rents, with no current signs of slowing."

lareit Funds from Operations Attributable to Stockholders and OP Unit Holders (Nareit FFO), Core FFO Attributable to Stockholders and OP Unit Holders (Core FFO), and Adjusted FFO Attributable to Stockholders and OP Unit Holders (Adjusted FFO) (1)

Nareit defines Funds from Operations ("FFO") as net income (loss) computed in accordance with GAAP, excluding: (i) gains (or losses) from sales of property and gains (or losses) from change in control; (ii) depreciation and amortization related to real estate; (iii) impairment losses on real estate and impairments of in-substance real estate investments in investees that are driven by measurable decreases in the fair value of the depreciable real estate held by the unconsolidated partnerships and joint ventures; and (iv) adjustments for unconsolidated partnerships and joint ventures, calculated to reflect FFO on the same basis. We believe Nareit FFO provides insight into our operating performance as it excludes certain items that are not indicative of such performance

Core FFO is calculated as Nareit FFO adjusted to exclude certain recurring and non-recurring items including, but not limited to: (i) depreciation and amortization of corporate assets; (ii) changes in the fair value of the earn-out liability; (iii) amortization of unconsolidated joint venture basis differences; (iv) gains or losses on the extinguishment or modification of debt and other; (v) other impairment charges; (vi) transaction and acquisition expenses; and (vii) realized performance income. Core FFO provides further insight into the sustainability of our operating performance and provides an additional measure to compare our performance across reporting periods on a consistent basis by excluding items that may cause short-term fluctuations in net income (loss)

Adjusted FFO is calculated as Core FFO adjusted to exclude: (i) straight-line rent and non-cash adjustments, such as amortization of market lease adjustments, debt discounts, deferred financing costs, and market debt adjustments; (ii) recurring capital expenditures, tenant improvement costs, and leasing commissions; (iii) non-cash adjustments, (ii) recurring capital experiouries, terrant improvement costs, and leasing continuous loss instance-based compensation expenses; and (iv) our prorated share of the aforementioned adjustments for our unconsolidated joint ventures. Adjusted FFO provides further insight into our portfolio performance by focusing on the revenues and expenditures directly involved in our operations and the management of our entire real estate portfolio. Recurring property-related capital expenditures are costs to maintain properties and their common areas, including new roofs, paving of parking lots, and other general upkeep items, and recurring corporate capital expenditures are primarily costs for computer software and equipment.

Total debt, excluding discounts, market adjustments, and deferred financing expenses, less cash and cash equivalents

Calculated by dividing net debt by Adjusted EBITDAre (included on an annualized basis within the calculation). It provides insight into our leverage rate based on earnings and is not impacted by fluctuations in our equity price.

Ratio is calculated by dividing net debt by total enterprise value. It provides insight into our capital structure and

usage of debt.

Calculated as total operating revenues, adjusted to exclude non-cash revenue items, less property operating expenses and real estate taxes. NOI provides insight about our financial and operating performance because it provides a performance measure of the revenues and expenses directly involved in owning and operating real estate assets and provides a perspective not immediately apparent from net income (loss).

Calculated by dividing (i) the total square feet of retained Neighbors with current period lease expirations by (ii) the total square feet of leases expiring during the period. The portfolio retention rate provides insight into our ability to retain Neighbors at our shopping centers as their leases approach expiration. Generally, the costs to retain an existing Neighbor are lower than costs to replace with a new Neighbor.

Calculated by dividing (i) total recovery income by (ii) total recoverable expenses during the period. A high recovery rate is an indicator of our ability to recover certain property operating expenses and capital costs from our

Larger scale projects that typically involve substantial demolition of a portion of the shopping center to accommodate new retailers. These projects typically are accompanied with new construction and site infrastructure costs.

Refers to a property, or portfolio of properties, that has been owned and operational for the entirety of each reporting period (i.e., since January 1, 2022).

Net debt plus equity market capitalization on a fully diluted basis.

Glossary of Terms

Underwritten incremental unlevered vield

Reflects the yield we target to generate from a project upon expected stabilization and is calculated as the estimated incremental NOI for a project at stabilization divided by its estimated net project investment. The estimated incremental NOI is the difference between the estimated annualized NOI we target to generate by a project upon stabilization and the estimated annualized NOI without the planned improvements. Underwritten incremental unlevered yield does not include peripheral impacts, such as lease rollover risk or the impact on the long term value of the property upon sale or disposition. Actual incremental yields may vary from our underwritten incremental yield range based on the actual total cost to complete a project and its actual incremental NOI at stabilization.
